In-Depth—Infantile Spasms (West Syndrome)

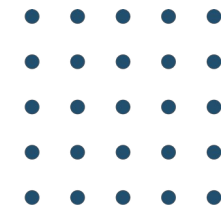

Content

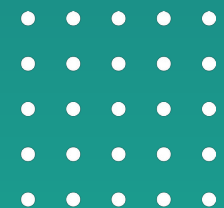

This rare form of infant epilepsy requires swift intervention to limit developmental setbacks. At Nilakantha, infants undergo EEG monitoring, neuroimaging, and genetic/metabolic testing to form individualized treatment plans. nilakanthabrainclinic.com

Nilakantha Brain Clinic

Focus Feature Lennox-Gastaut Syndrome

Heading: Managing Lennox-Gastaut Syndrome (LGS)

Content:

LGS is a challenging pediatric epilepsy marked by multiple seizure types and developmental delays. The clinic employs early diagnosis and integrated therapies to enhance quality of life.
